1.4 Scope of the project

This project aims to develop an efficient and user friendly School Activity Management System thats very easy for all parties involved to use. The project will let Students to enroll in to clubs that they like, advisors will be able to manage clubs, events and generate reports for the clubs and events and the admin will have control over the whole application as they are allowed to make clubs, add students and advisors, schedule events and delete scheduled events

2. Requirement Analysis

2.1 Use Case Diagram

2.2 Use Case Descriptions

USE CASE 1 – ENROLL TO A CLUB

Section - Main

System - SACMS

Actors - Student

Purpose - To allow students to enroll in clubs

Overview – A student browses through the list of available activity clubs in the SACMS. Then the user can select an activity club and enroll in it by clicking the enroll button. The system checks if the student is already enrolled in the activity club they selected. The system also checks if the student is already enrolled in 3 activity clubs. After verifying the details, the user is allowed to enroll in the club. The user data is then stored in the system.

Pre-conditions - The student has a valid account in the SACMS and the student is not already enrolled in the club they want to register for.

Actor Actions	System Response
1. User browses the list of available activity clubs.	
2. User selects an activity club and clicks the "Enroll" button	3. System checks whether the student is already enrolled in the selected club.
	4. System verifies that the student is not already enrolled in 3 clubs.
5. User enrolls in the club	6. Stores user data in the database.

USE CASE 2 – LOGIN TO SACMS

Section - Main

System - SACMS

Actors – Student, Advisor, Admin

Purpose - To allow users to access the SACMS

Overview – User enters their username and password and clicks sign in button. System verifies the user by searching for the username. System assigns a role to the user using the verified username. System presents the dashboard that has been assigned to the user's role. Users can then navigate through their assigned dashboard.

Pre-conditions – Actor has to be registered to the SACMS in order to sign in.

Actor Actions	System Response
1. User enters their username and password.	
2. User clicks "sign in" button	3. System verifies the user using the username.
	4. System assigns the role to the user based on the saved username in the system.
	5. System presents the dashboard assigned to the user's role.
6. User can navigate through assigned dashboard.	

USE CASE 3 – REGISTER TO SACMS

Section - Main

System - SACMS

Actors – Admin

Purpose – To register an admin to SACMS

Overview – System displays the sign up menu. Users can choose from 3 buttons presented on the screen. Since the user is an Admin, the user can click on admin button. The system prompts the user to input their id. The user inputs their ID. The system verifies the user's ID and prompts the user to enter their personal details. System verifies the personal details and stores the details in the system. The system presents the sign in page to the user.

Pre-conditions – The user must know the specific admin ID format.

Actor Actions	System Response
	1. System displays the sign up menu.
2. User clicks on "Admin" button	3. System prompts the user to input their ID
4. User inputs their ID	5. System verifies the entered ID
	6. System prompts user to enter their personal details
7. User enters their personal details	8. System verifies the user's personal details and stores the details.
	9. System presents sign in page

USE CASE 3 – USER REGISTER TO SACMS

Section - Main

System - SACMS

Actors – Student, advisor

Purpose – To register an advisor and student to SACMS

Overview – System displays the sign up menu. Users can choose from 3 buttons presented on the screen. Since the user is either an advisor or student, the user can click on advisor button or student button. The system prompts the user to input their id, username and club assigned by admin. The user inputs their ID, username and club. The system verifies the user's details and prompts the user to enter their personal details. System verifies the personal details and stores the details in the system. The system presents the sign in page to the user.

Pre-conditions – The user must know their assigned username and ID.

Actor Actions	System Response
	1. System displays the sign up menu.
2. User clicks on "Advisor/Student" button	3. System prompts the user to input ID, username and club assigned by admin
4. User inputs their ID, username and club	5. System verifies the entered details
	6. System prompts user to enter their personal details
7. User enters their personal details	8. System verifies the user's personal details and stores the details.
	9. System presents sign in page

USE CASE 4 – SHEDULE EVENT

Section - Main

System - SACMS

Actors – Admin, Advisor

Purpose – To schedule events for clubs.

Overview – User enters event details into the event schedule management system. The system checks to see if the entered date and time is available. The system also verifies that less there's less than 3 events held on the entered date. Then, the user schedules the event. The system stores the details of the event and presents it to the user in a form of a table.

Pre-conditions – The entered dates and times should be free for the event to be held.

Actor Actions	System Response
1. User enters the details of the event into the event schedule management.	2. System checks to see if entered date and entered time is available and also if there are less than 3 events on the entered date.
3. User can schedule the event	4. Event details are stored in the system.
	5. System presents the entered details in a table to the user.

USE CASE 5 – CREATE CLUB

Section - Main

System - SACMS

Actors – Admin

Purpose – To create a new club.

Overview – User enters the club's name and clicks the create club button. System verifies if the club with the exact name is already created. System stores the club details. Created club will be shown to the user.

Pre-conditions – Entered club name should not already exist.

Actor Actions	System Response
1. Enter Club name and click "Create Club"	2. System checks to see if the club is already made.
	3. Club details are stored in the system.
4. Created club will be shown to the admin	.

USE CASE 6 – GENERATE REPORT

Section - Main

System - SACMS

Actors – Admin, Advisor

**Purpose** – To generate reports for the clubs and events.

Overview – User clicks either "Generate Club Report/Generate Event Report " and the details of the clubs/events will be saved onto a text file and the user is prompted to save it wherever they like.

**Pre-conditions** – Entered club name should not already exist.

Actor Actions	System Response
1. Enter Club name (Advisor can only see their respective clubs) and click "Generate Club Report/ Generate Event Report"	2. Print out the details of the club/events of the club into the text file.
3. User can save the file wherever they like.	

7. Activity Diagrams

USE CASE 1 – ENROLL TO A CLUB

| Student	SACMS
(start) → Select Club → Click enroll	If clubs enrolled > 3 → (decision) → Enrolled Successfully → (end)

USE CASE 2 – LOGIN TO SACMS

USE CASE 3 – REGISTER TO SACMS

USE CASE 4 – SCHEDULE EVENT

USE CASE 5 – CREATE CLUB
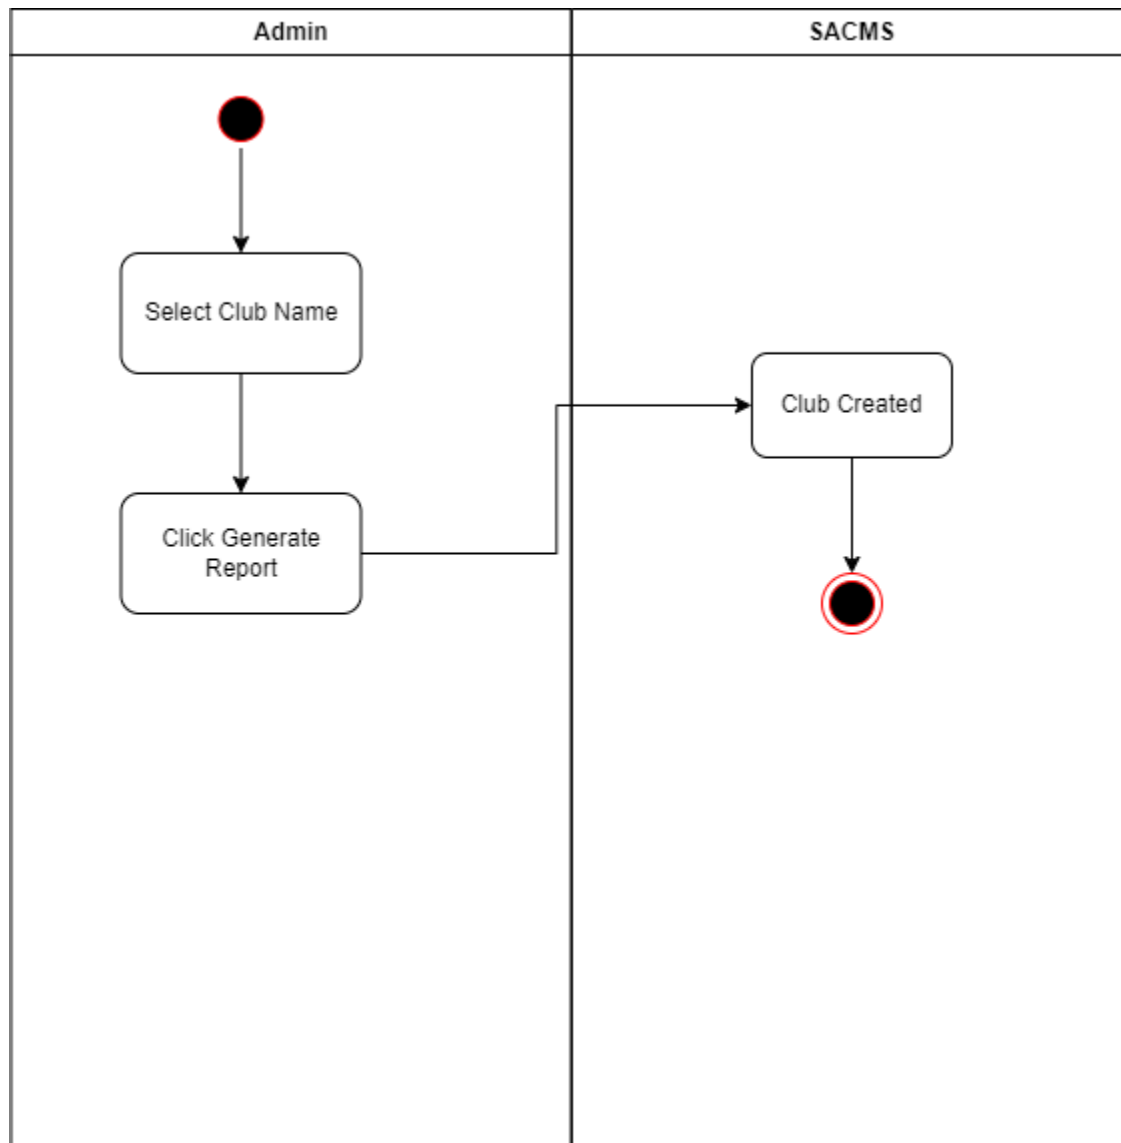

USE CASE 6 – GENERATE REPORT
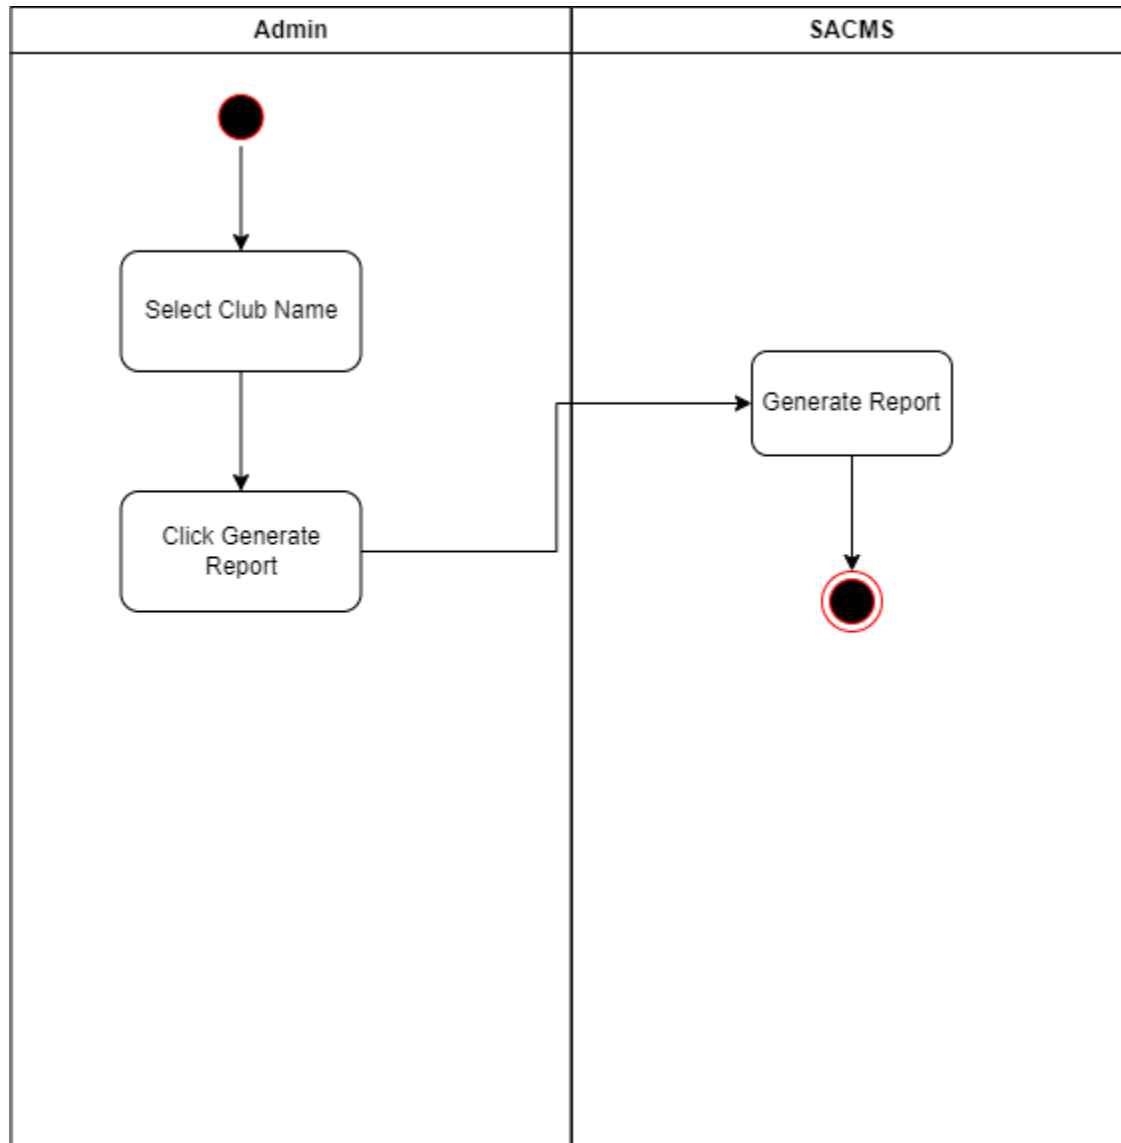

8. Single Class Diagram
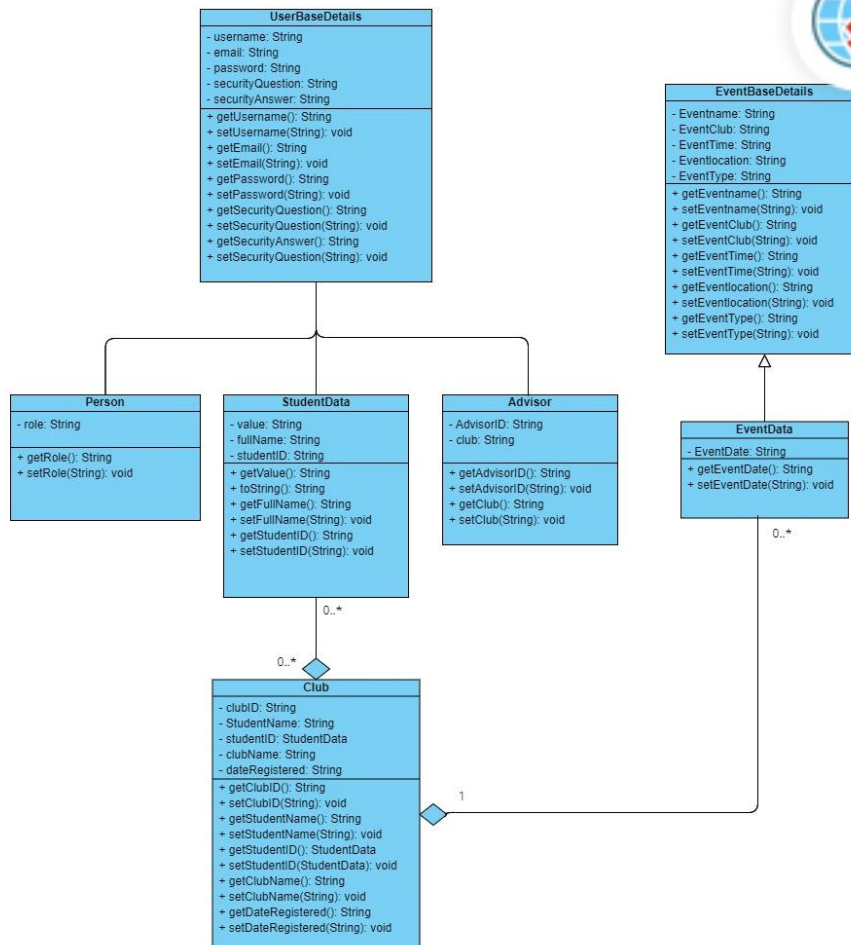

9. Sequence Diagrams

USE CASE 1 – ENROLL TO A CLUB
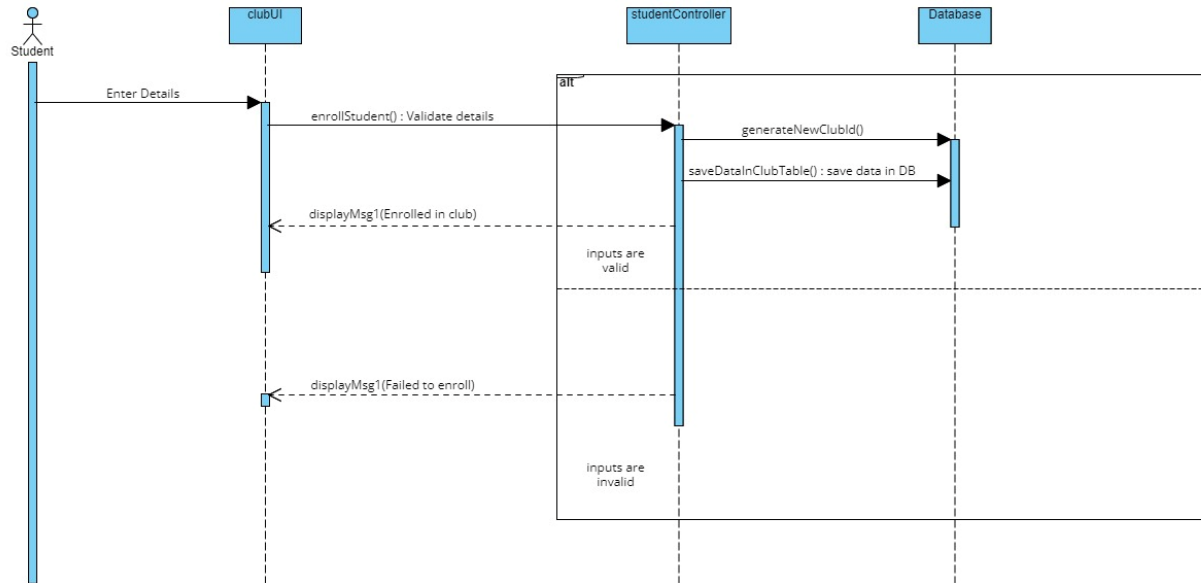

USE CASE 2 – LOGIN TO SACMS

Admin Login
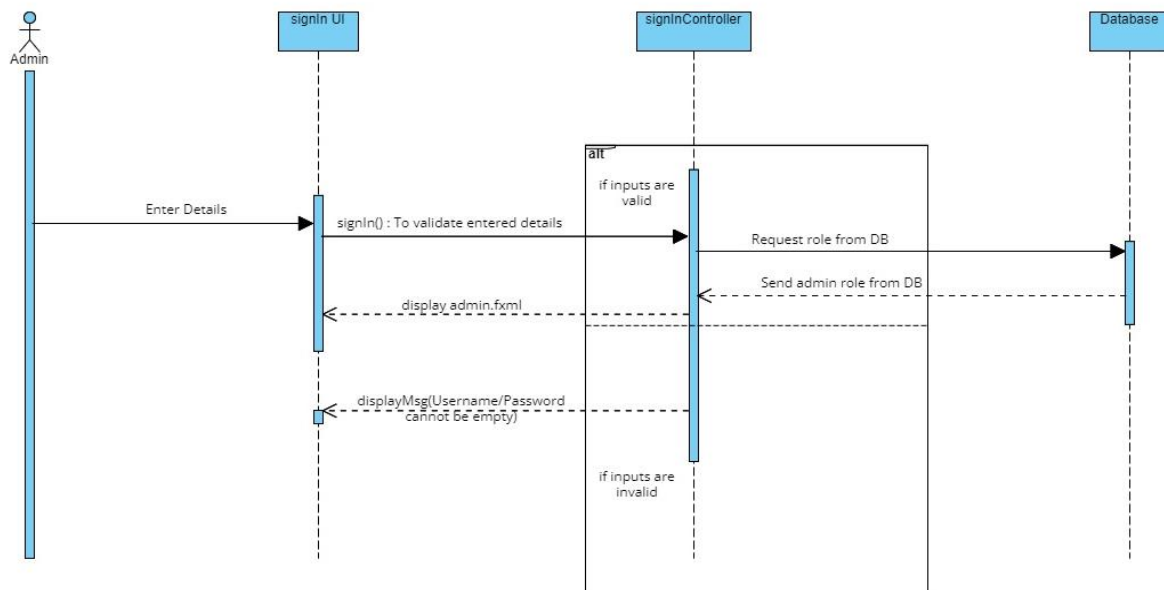

Advisor Login
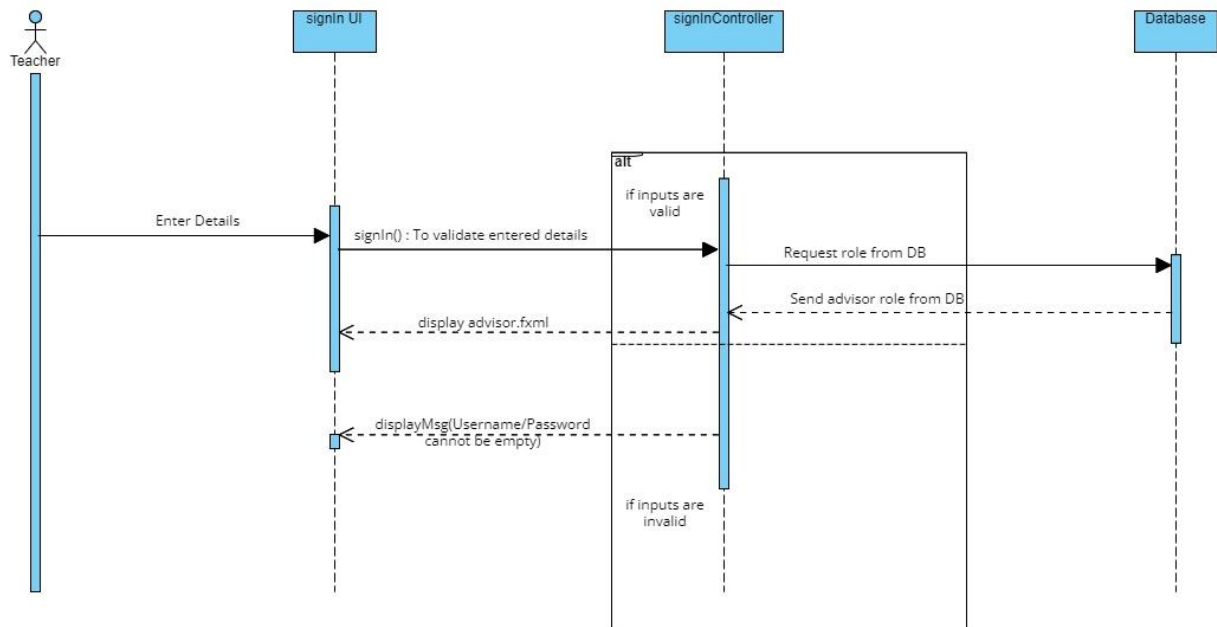

Student Login
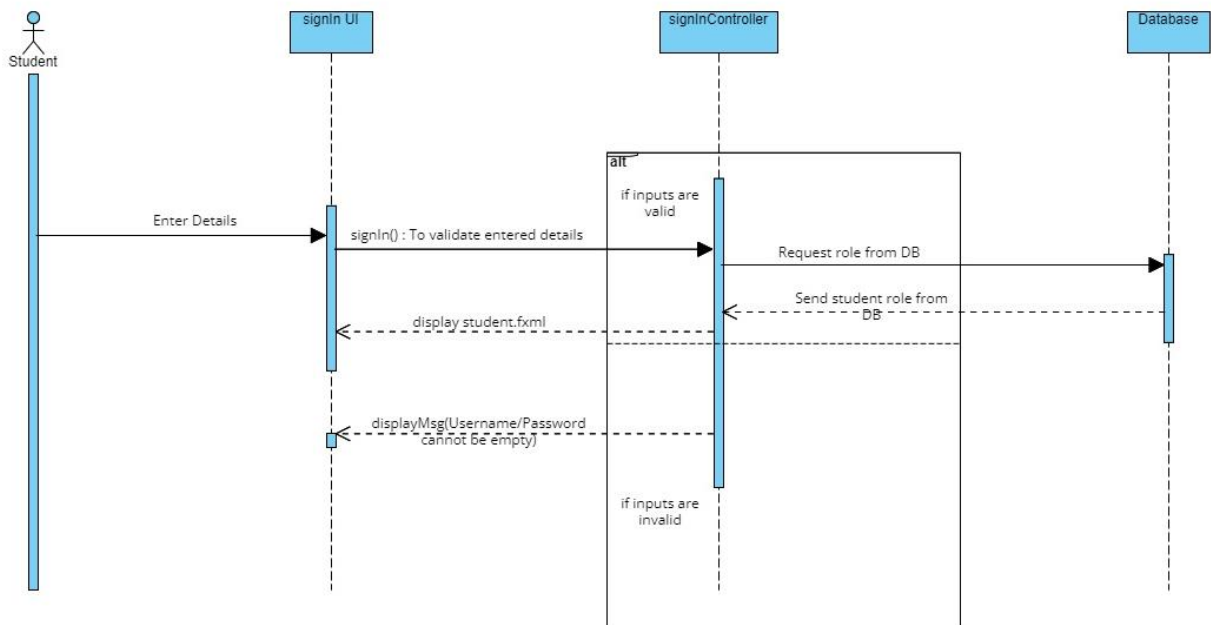

USE CASE 3 – REGISTER TO SACMS

Admin Register
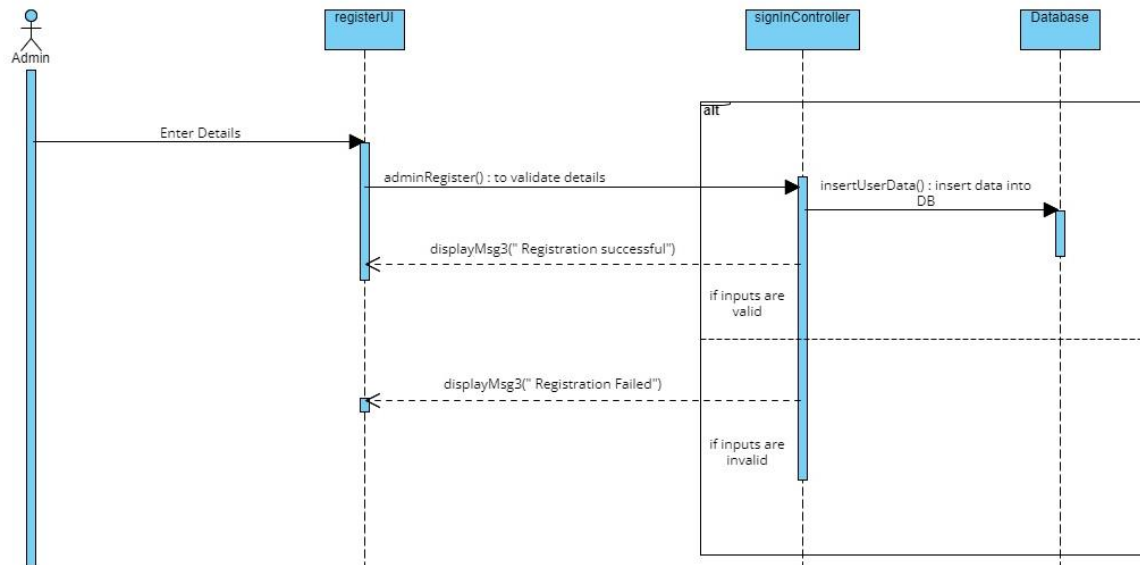

Admin assign Advisor to the system
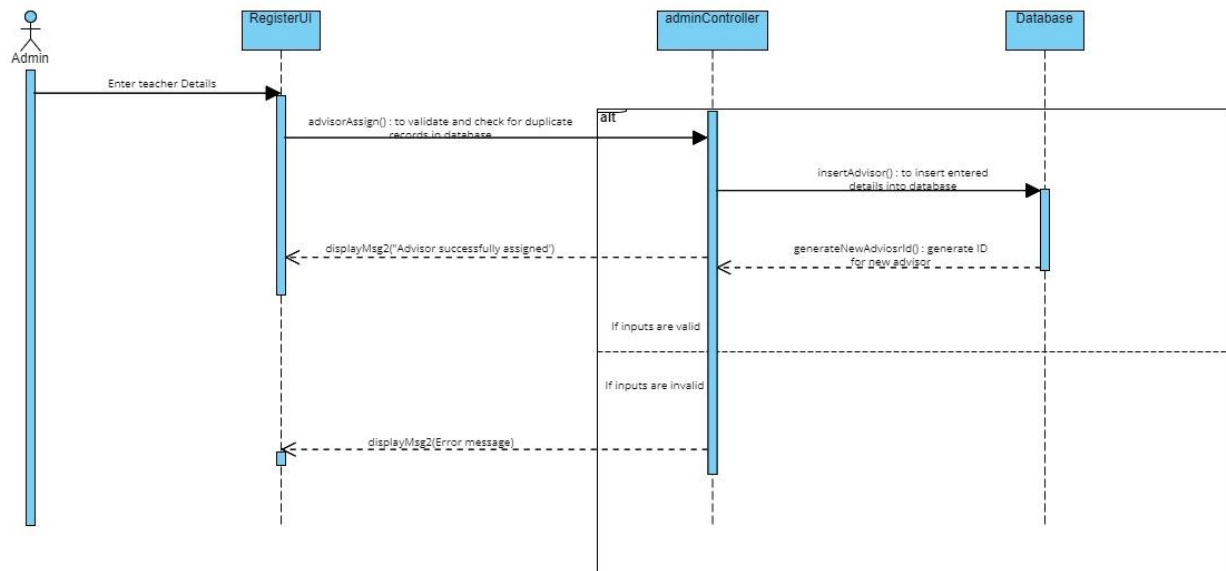

Advisor Register
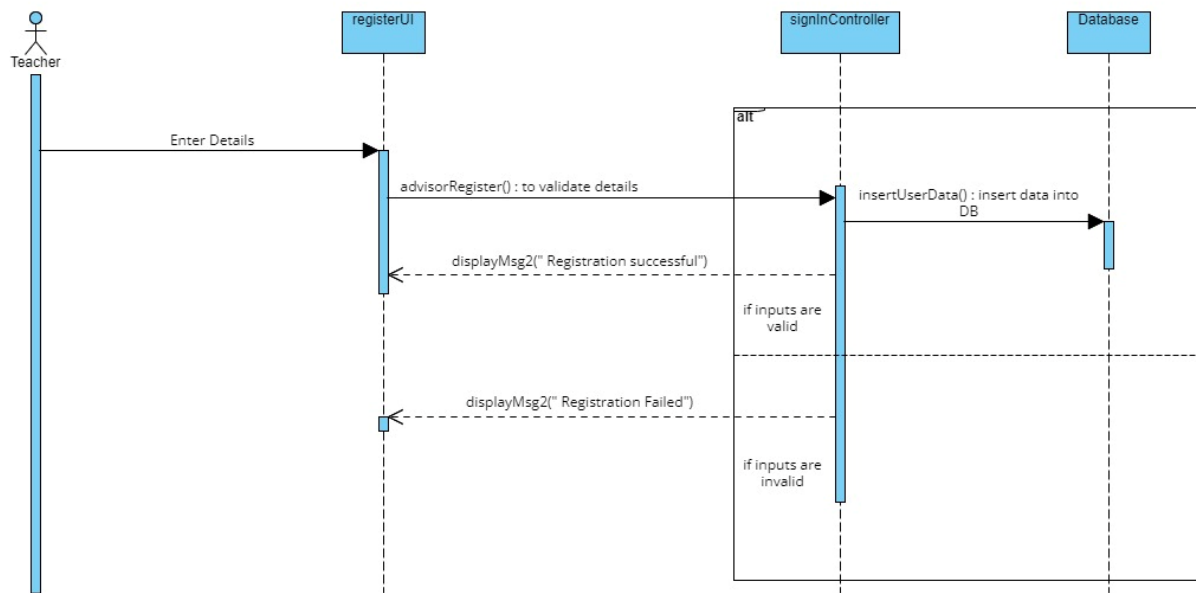

Admin assign Student to the system
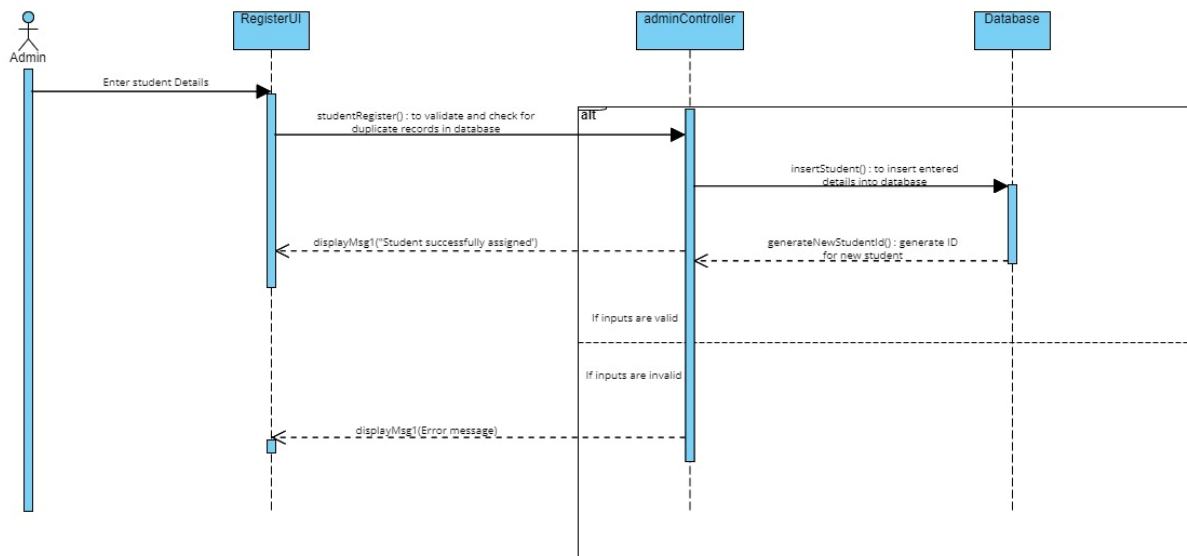

Student Register
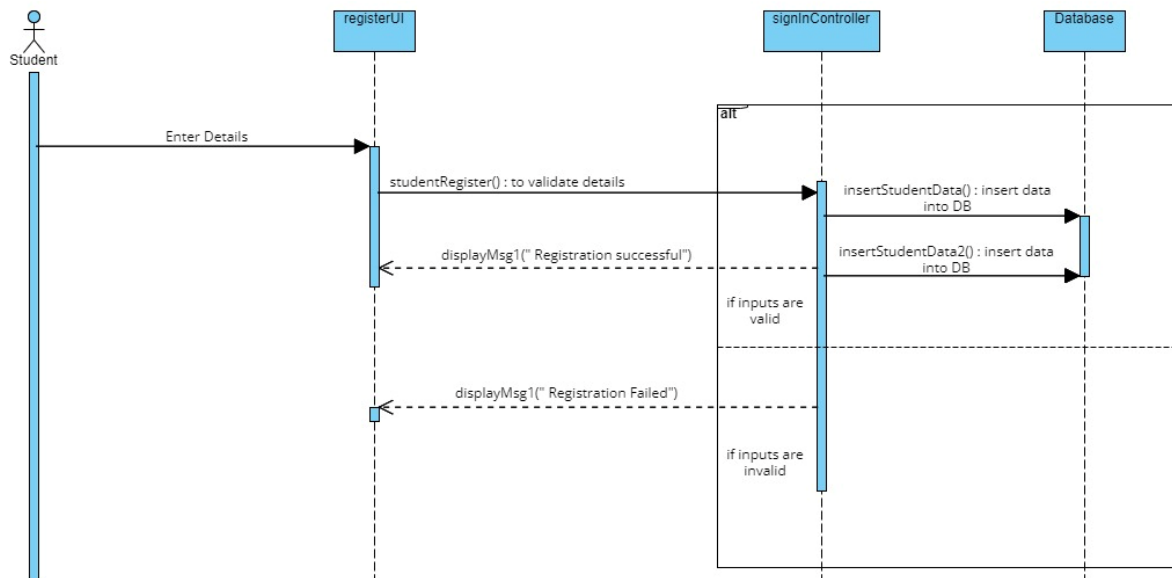

USE CASE 4 – SCHEDULE EVENT

Admin Schedule Events
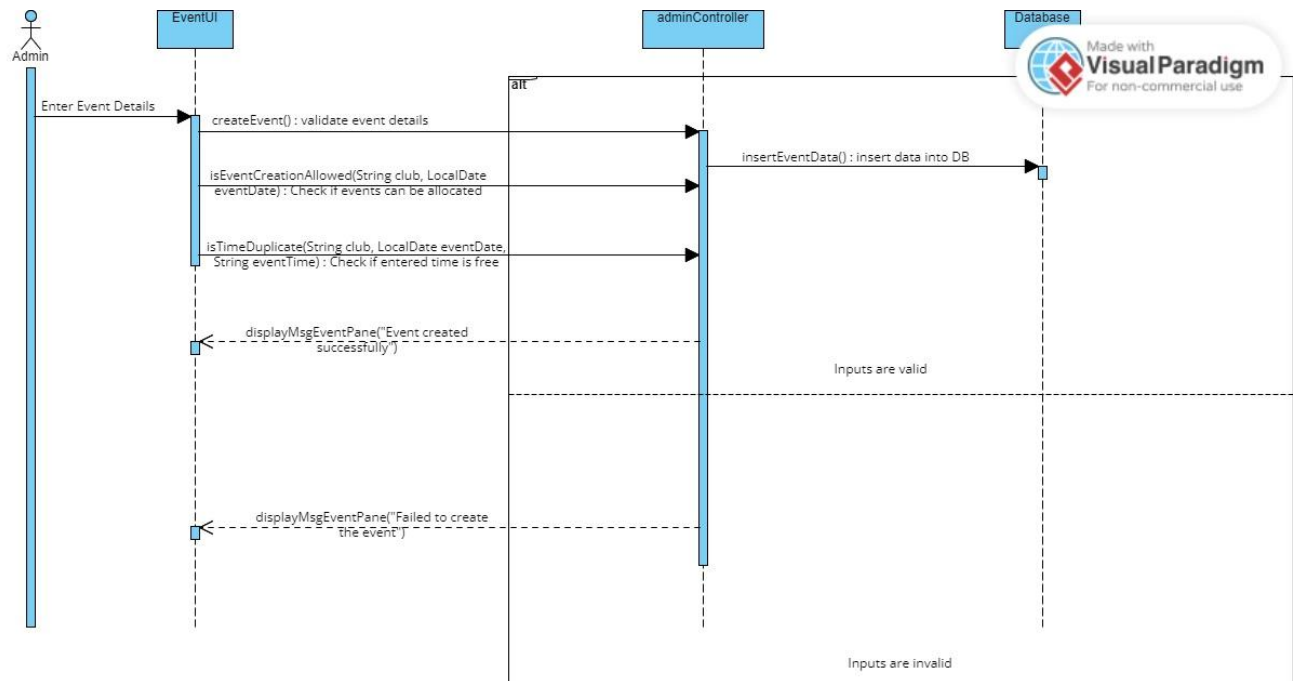

Advisor Schedule Events

Advisor → **EventUI** → **advisorController** → **Database**

Enter Event Details

createEvent() : validate event details

insertEventData() : insert data into DB

isEventCreationAllowed(String club, LocalDate eventDate) : Check if events can be allocated

isTimeDuplicate(String club, LocalDate eventDate, String eventTime) : Check if entered time is free

alt

displayMsgEventPane("Event created successfully")

Inputs are valid

displayMsgEventPane("Failed to create the event")

Inputs are invalid

USE CASE 5 – CREATE CLUB

Admin → **clubUI** → **adminController** → **Database**

Enter Club Name

createClub() : validate club name

createClubTable()

insertClub() : insert data into DB

alt

displayMsgCreateClub(Club successfully added)

If inputs are valid

displayMsgCreateClub(Failed to add new club)

If inputs are invalid

10.   Test Plan

10.1 Enroll to a Club

- When Student already enrolled in 3 clubs

Normal Test Case	Expected Output	Actual Output
Student Id – S2200001 Student Username – Nisitha Club – Science Club	"Enrolled Successfully"	"Student Nisitha is already enrolled in three clubs"

- When student is trying to enroll for the same club

Normal Test Case	Expected Output	Actual Output
Student Id – S2200001 Student Username – Nisitha Club – Tennis Club	"Enrolled Successfully"	"Student Nisitha is already enrolled in Tennis clubs"

10.2 Login to SACMS (Admin, Advisor, Student)

- When user entered wrong username or password

Normal Test Case	Expected Output	Actual Output
Username – Nisi Password - Nisitha123	Login Successful	"Incorrect Username/Password "

- When user entered correct details

Normal Test Case	Expected Output	Actual Output
Username – Nisitha Password - Nisitha123	Login Successful	Login Successful

10.3 Register to SACMS (Admin, Advisor, Student)

- If the fields are left blank

Normal Test Case	Expected Output	Actual Output
Username – ? (blank) Email – ? (blank) Password – nisitha123 Confirm Password – nisitha123 Select Question - ?(blank) Answer - ? (blank)	"Registration Successful"	"Please fill all required fields"

- If the fields are left blank

Normal Test Case	Expected Output	Actual Output
Username – ? (blank) Email – ? (blank) Password – nisitha123 Confirm Password – nisitha123 Select Question - ?(blank) Answer - ? (blank)	"Registration Successful"	"Please fill all required fields"

- When user entered a username that already exist

Normal Test Case	Expected Output	Actual Output
Username – thenuki Email – thenuki@gmail.com Password – thenukii Confirm Password – thenukii Select Question – What is your favorite food? Answer - bownies	"Registration Successful"	"thenuki is already taken"

- When user entered invalid email

Normal Test Case	Expected Output	Actual Output
Username – thenuki Email – thenuki.com Password – thenukii Confirm Password – thenukii Select Question – What is your favorite food? Answer - bownies	"Registration Successful"	"Invalid email address"

- When password is in incorrect format

Normal Test Case	Expected Output	Actual Output
Username – thenuki Email – thenuki@gmail.com Password – thenu Confirm Password – thenukii	"Registration Successful"	"Invalid Password"

Select Question – What is your favorite food? Answer - bownies		

- When confirm password does not match

Normal Test Case	Expected Output	Actual Output
Username – thenuki Email – thenuki@gmail.com Password – thenukii Confirm Password – thenu Select Question – What is your favorite food? Answer - bownies	"Registration Successful"	"Password do not match"

- When security question is not selected

Normal Test Case	Expected Output	Actual Output
Username – thenuki Email – thenuki@gmail.com Password – thenukii Confirm Password – thenukii Select Question – ?(blank) Answer - bownies	"Registration Successful"	"Please go back and select a club"

- When all the details are correct

Normal Test Case	Expected Output	Actual Output
Username – thenuki Email – thenuki@gmail.com	"Registration Successful"	"Registration Successful"

Password – thenukii Confirm Password – thenukii Select Question – What is your favorite food? Answer - bownies		

10.4 Schedule Event (Admin, Advisor)

- If the fields are left blank

Normal Test Case	Expected Output	Actual Output
Event Name – Club Meeting Select club - ? (blank) Event Date - ? (blank) Event Time – 10:00:00 Location – Online Event type - Meeting	"Event Create Successfully"	"Please fill in all required fields "

- If the user tries to schedule two events in a same club in same day

Normal Test Case	Expected Output	Actual Output
Event Name – Club Meeting Select club – Tennis Club Event Date – 12/9/2023 Event Time – 10:00:00 Location – Online Event type - Meeting	"Event Create Successfully"	"You can only create one meeting per club per day and a maximum of two meetings in total per day"

ROBERT GORDON
UNIVERSITY ABERDEEN
TEF
Gold

INFORMATICS
INSTITUTE OF
TECHNOLOGY

- If the user tries to schedule two events in same time in same day in any club

Normal Test Case	Expected Output	Actual Output
Event Name – Club Meeting Select club – Tennis Club Event Date – 12/9/2023 Event Time – 10:00:00 Location – Online Event type - Meeting	"Event Create Successfully"	"An event already exists at the specified time"

- If the user tries to schedule two events on a previous day

Normal Test Case	Expected Output	Actual Output
Event Name – Club Meeting Select club – Tennis Club Event Date – 10/9/2023 Event Time – 10:00:00 Location – Online Event type - Meeting	"Event Create Successfully"	"Event date cannot be set to a previous date"

- If all the inputs are correct

Normal Test Case	Expected Output	Actual Output
Event Name – Club Meeting Select club – Tennis Club Event Date – 12/9/2023 Event Time – 10:00:00 Location – Online Event type - Meeting	"Event Create Successfully"	"Event Create Successfully"

10.5 Create Club

- When user enter a club that already exists

Normal Test Case	Expected Output	Actual Output
Club Name – Tennis Club	"Club name successfully added"	"Club name is already taken"

- When the club name is in incorrect format

Normal Test Case	Expected Output	Actual Output
Club Name – Club Tennis	"Club name successfully added"	"Club name must be in the format xxxx club"

- When entering correct details

Normal Test Case	Expected Output	Actual Output
Club Name – Tennis Club	"Club name successfully added"	"Club name successfully added"
